RE: Central Sierra Connect – Year 3/Quarter 4

Dear Devla,

On behalf of Central Sierra Connect Broadband Consortium, I am submitting our quarterly report for the 4th quarter of our Year 3 activities. This quarter's activities were focused on the following primary objectives:

- Great effort was spent on assisting an interested ISP in their application process for 2 CASF infrastructure grant projects for all 5 of our counties by way of making presentations to the Boards of Supervisors in 4 counties to garner written support (Resolutions); making presentations to various community groups for their letters of support for these same projects; and reviewing grant applications, making suggestions
- Completed a status update for telehealth in our region
- Continued work on a broadband sustainability plan and public policy outreach for our region in preparation for when the grant funding is exhausted
- Wrote report for, attended and participated in the CPUC Year 3 Learning Summit

For the next quarter, our consortium plans to begin work on our Year 4 plan, assuming we are approved for an extension and we are authorized to implement this work plan.

Respectfully submitted,

Kathleen K Haff
CSC Management and Public Services Coordinator
Cc: Shelly Hance – ATCAA Executive Director
